Stannten Speciator.

TAUNTON, VA. TV20047, 39MR 11, 1801.

We this week follow the example of a unjort-ty of our cotemporaries in leaving a half sheet. There are many reasons why most of the new-papers sheald lesse but a half sheet, not the smallest of which is the fact that they are now publishing their papers at an expesse to their own position, and the fact that paper mills are enable-negated above the he most quantity. isset of which is the fact that they are now lishing their papers at an expesse to the same of their number of their supprise and amazement that the paper mills are lish to supply them with the usual quantity contentions to supply them with the usual quantity contentions to supply them with the usual quantity contentions the same of the same of their good-morning? in the streng voice of despondent of their contents. Whether we will resume the soutests. Whether we will resume publication of a whole sheet will depend a sireumations. When the means of being slick with paper, and the business of the supplementations improved assignately to justify say become improved assignately to justify we will resume the issuing of a whole sheet. supplied with paper, and the business of the country become improved safficiently to justify it, we will resume the issuing of a whole sheet

is, we will resume the issuing of a whole sheet as between the issuing as half absets, and would not do so todge other directions. As we are sow publishing the per at a lose to corresil, we hope that all those who are earling for advartising, job work, or only sorting the per and the sound of the per and sheets, pillow cases, &c., that are ho lonplied to the purposes designated will be proper-ly appropriated if left at the store of Mr. Geo.
