NOTICE TO TREPAMERS.

The SuperStown Has

perialmed by the impaction of the sensities, that the uniform pro-main biribs is at to 25; macroting arriage, overy twenty-dam is no -Smith's Treation on Population.

I have long been passed to green, And so I have frequently said, What the reason really could be That I never have hoppened to wed

But now it is purpostly clear.

I am under a minural bon;

The girls are already assigned—

And I'm a experient man!

They're got a supermone man:
By twanties and twenties they go,
And giddity rash to their she,
For none of the anniher, of source,
One full of engingal mate;
And white they are yielding in soor
70 Natura's influcible plus,
Thur's zerier a nonea for me—
For I'm a anyerfluone man!

For it is not that I my a chart,
It isn't that I my a chart,
To notitude ever inclined,
I fer't that I may a fight
I morph, or manners or Sind;
I am north, or manners or sind;
I am a still with the hatcher chan?
I morely was mannhord aman.
And I'm a superfood man:

And I'm a copyriocol man! It inn't that I am is want Of pursuals heavily or greec, For many a man with a wife is ugive far In the face; Indeed, among ologane men, I face; myself is the wan, Ball what is the value of that Whee I'm a superfluots man!

When I'm a superfluots man!
Although I am fond of the girls
For angle I sould were chosen,
The bunder emotions I feel
I so not that many nervel resters;
This idle to quarrel with fate,
For struggle as hard as I can,
They're maked already, you knowAnd I'm a superfluots man!

No wooder I gramble at times, With weman to preity and plenty, To know that I never was born To figure as one of the Twenty;

With critical vision I soan, I think it may be for the best That I'm a superflows man i

An Impressive Scene--Rishep Meade

18 was a beautiful evening in the summer of 1883. The sky was cloudless. The san was samily setting. Its bright, alsaling rays persong through a curtained window, lighted up the recen in which the scene now about to be released was occurring. In a plain but specious man-sion had long lived, and was dying, the great and good Bishop Messle, Bishop of the 72 great that Episcopal Church.

Joind the common walks of life, quite on the transport heward."
His bour had come. With holy seresity, but the head of meagret plant is produced. When the padients wisce, he bid a last action to all, both friend and stranger, in his room, except one, and gave to each his dying charge. The stroption of the training of the cryp has been thus impaired, the quantity of mola see is diminished. The differentiations was the season of the common of the c

point of time, in sight of esternity, permit me to give yes my last injuscious.

"For a considerable period I thought this war an majusc one, and was for maintaining the United States. But when I saw Lincoln's proclamation, my eyes were opened, and I skw nothing remained to the South but deepes degradation or war to the States and I skw nothing remained to the South but deepes degradation or war to the States and I saw done all in my power for the Condelecta arms. Best i can do so more. God calls and I go at his summone. Gen Les, you are sengard in a holy smaller. In such you are sengard in a holy smaller million. I saw it now as I have CO-PARTHRESHIP NOTICE.

WE have this day, they lith, 1855, extered into makers millions. I see it now as I have have the O-partnessity, for the purpose of conducing the control of the co

After the sell has been well here-sughly priverised the process of mes very simple. The space be-re may be a little fear thee are al-

Bits, on the other hand, the mode of colities-ting in hills has the advantage of greater conve-nience in planting and hosting.
If then the objects its canate the lead yold a full erop of the largest possible catalay, we be-lieve the plant of crilling is best. This should be done with cars. If the soft is at all shootly it is best to it a band follow the plough which draws the ferrows for planting, with a garden rate, and ramove the clock from the bottom of the farrows. The seed should then be essi-tuated and control the seed.

tipes as many produce stalls. The eventing should be with very loose moold, and not more than an issel in depth. When the plants are electroneously state, they should be thinsed out, so so to stand at distance of 4 to 7 inches spart.

If land is more abundant than labor, the method of planting in this is probably best.—For the amount of labor necessary is then less, both in planting and solivating. In this the forrows need not be so carriedly prepared; for the seads are to be dropped in sluster, and the persons dropping may, the great attest, avoid larg shots. The distance between the bills is generally from 1 1-2 to 2 fest; and when the islanding is done, from 3 to 6 stalks are left areadise in sone group.

ruser may grow in classers. The contain a greeter per centum of sacor than the small opes, and thus probably more than compensate in number. Honce the conduct furners, that a coop in drills is tive of molasses, than the same and planted in bills.
